Fundraising Contract - Planning and Design

- Contributors will send money to a smart contract instead of to a person's bank account;

- In a traditional application the campaign administrator has full control of the donated funds, there is no outside control;

- In our contract the admin must create a spending request that must be voted by the contributors before that amount is released and sent to the recipient - the vendor, supplier;

- **The power is moved from the campaign admin to those that donated money;**

- The Fundraising campaign will have a **deadline** and a **goal** and if any of these two conditions are not met **the contributor will get a refund**;
